-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Specification

1. The title of the invention is excessive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: Simultaneous Serial Transmission of Messages with Data Field Arbitration.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Regarding claims 1 and 10, the claims specify *providing the send signal to the message-sending module* (For example, see claim 1, lines 28-29.) The specification describes sending the report messages in a RMG according to a protocol designed to assure that all of them will be sent by all of the data processors DP1, etc. involved in perfect synchronism (See page 24, lines 22-23 and page 25, line 1.) If the report messages are transmitted at the same time with the same

number of bytes, it is unclear how one would resolve ownership of the bus to complete transmission. Further explanation and clarification is requested.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 1 and 10, the claims specify *encoding a node data value* (For example, see claim 1, line 12.) However, the content of the *node data value* is unclear from the context of the claim. Further explanation and clarification is requested.

Regarding claims 1 and 10, the claims specify *said report query message signal encoding a query data field* (For example, see claim 1, line 14,) and *a series of bits encoding the node data value* (For example, see claim 1, line 23.) However, it is well-known in the art that processors perform encoding, not signals. Further explanation and clarification is requested.

Allowable Subject Matter

6. Claims 1-17 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
